

THE NIGHTMARE BEFORE CHRISTMAS Inspired

Jack Skellington's
Gingerbread House
Templates

A note about this project

This is *just* the template for the Nightmare Before Christmas inspired Jack Skellington Gingerbread House. It does not contain the step by step directions or recipes for the gingerbread, sugar glues, gingerbread cement, candy Christmas lights, chocolate pumpkins or edible glass

It also does not contain instructions on how to create the tower support tubes or the topper as there are no real templates for those pieces.

For all this information and more including a complete walkthrough of the process and full color photos, please visit www.eatthedead.com

While every effort has been made to verify the accuracy of these templates, we're definitely not perfect, and sometimes that means minor errors in our math. If you discover an error, please don't hesitate to reach out with a note. We do our best to provide you with the best and are happy to make adjustments/corrections based on your suggestions and ideas!

FRONT VIEW

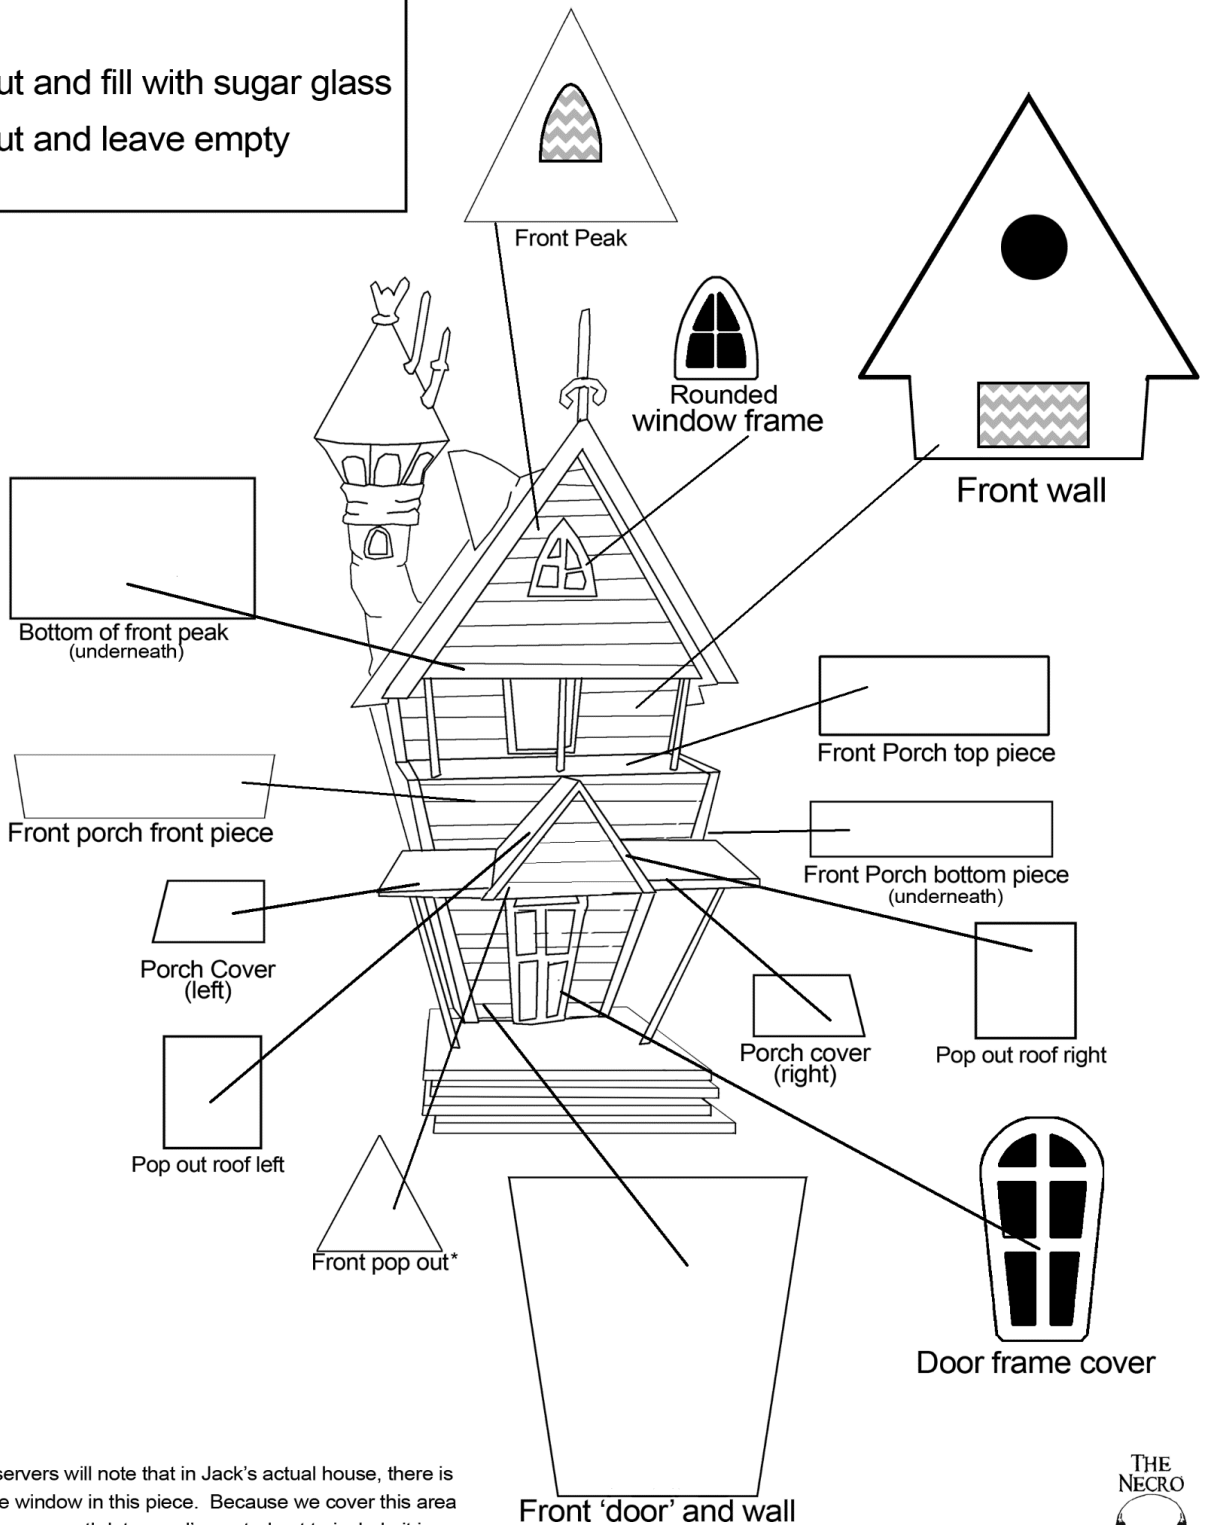

Key:

Cut out and fill with sugar glass

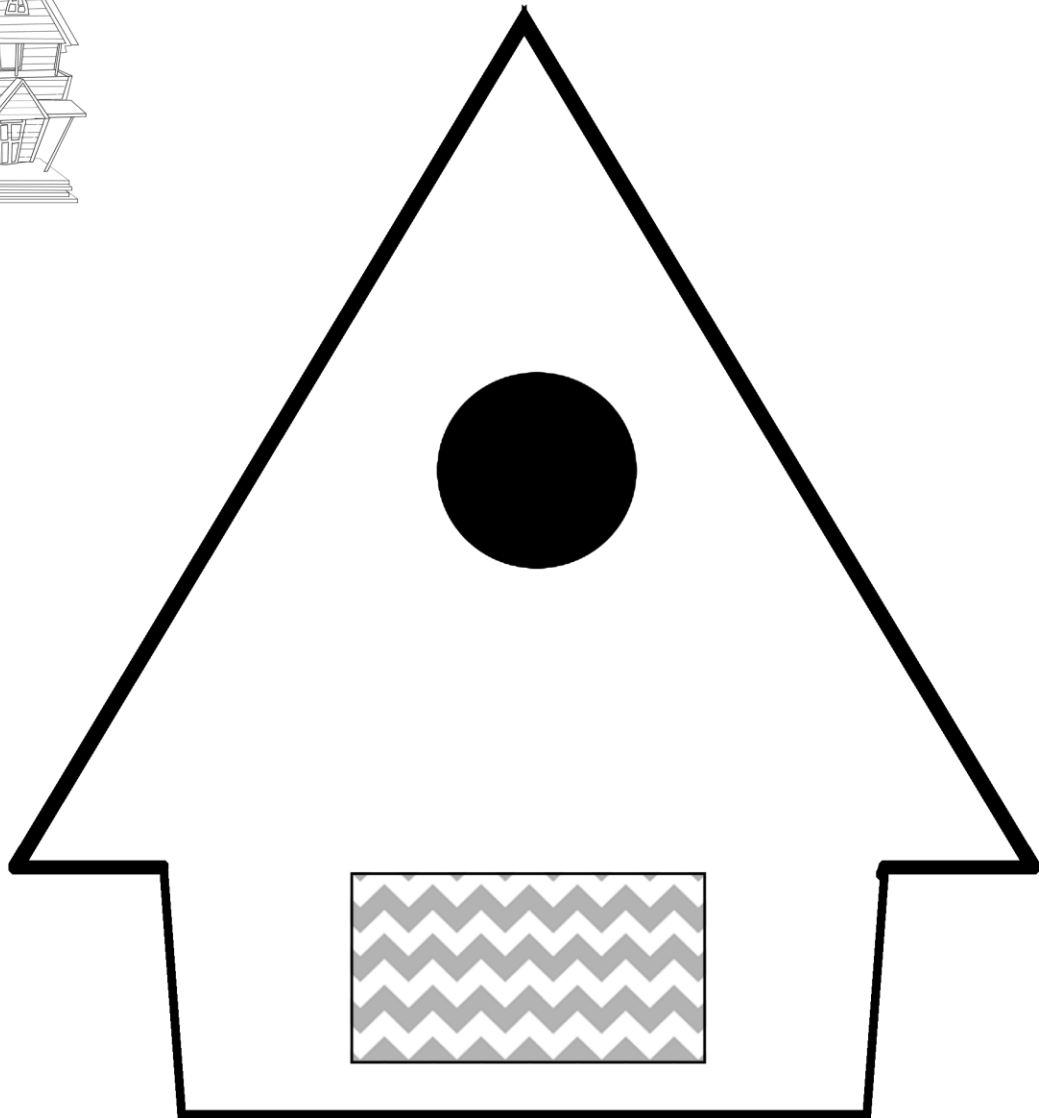

Cut out and leave empty

*Eagle eyed observers will note that in Jack's actual house, there is a small half circle window in this piece. Because we cover this area with our carnivorous wreath later on, I've opted not to include it in this tutorial. Feel free to add it in if you want, but trust me, it probably won't be seen once you start doing final assembly/decorating.
